

TRENCHLESS TECHNOLOGY ASSISTANT

- Consistent overtime with penalty rates
- Diverse and challenging projects
- Full time, permanent position with job security

Due to continued growth, DM Civil is seeking experienced trenchless technology assistants to expand our existing microtunnelling and horizontal boring operation.

Experience with the operation of Iseki, Rockman and Auger Boring machines is highly desirable.

To be successful in this position, you will:

- Have recent experience in microtunnelling, horizontal boring or civil construction labouring,
- Show initiative to learn and develop your skills,
- Be proactive when doing repetitive, manual duties,
- Hold a blue or white safety card, a current drivers license (HR preferred) and have your own transport.

Previous employment stability and a demonstrated understanding of technical and safety procedures are essential. You must also be willing to work across the greater metropolitan area.

These positions will predominantly be based in the Perth area with some opportunities for remote work.

A pre-employment medical including alcohol and drug screen will be required.
